Client Approval for Develop a Business Management System

Dear Sir,

This is the letter inform my approval for develop the Business Management system for our company. In the present stage, we use a manual system to do our business. We had to face a lot of difficulties using the current process. So, we hope this proposed system going to have a lot of good impact on our business.

I got to know your team is still undergraduates in there we have some risk but we see your team has confident to process with the project because that is the main reason we have decided to continue the business with your team.

For any further queries and clarification do not hesitate to contact us. Congratulations and all the best.

.....
